

Minutes from National iMedConsent™ VANTS Call

Wednesday, October 5, 2005

Ray Frazier, VA ESPD Project Manager

1. **Converting Saved Images From Color to B&W**

We discussed the possibility of reducing document transmission times and storage space by saving images to Vista in black & white instead of color. While the group agreed that consent forms could be saved in b&w without any significant concerns, anatomical images are sometimes annotated with different colors having different meanings. Since Dialog Medical does not currently have the capability to selectively save in b&w or color based on the document type, we decided to table this discussion at this time.

2. **Electronic Signature Pads**

Though there have been sporadic problems with signature pads on back-order, most POCs have been receiving facility and VISN support in the form of funding to buy more pads. Some facilities are not purchasing more signature pads due to lack of funding.

3. **Moratorium on New Technologies for iMedConsent Deployment**

There continues to be a lot of confusion about what facilities can and cannot buy for iMedConsent implementation.

- a. There is no moratorium on purchasing electronic signature pads, provided that they are purchased from the approved list of signature pad models (see the [ESPD website](#) for more information).
- b. There is no moratorium on purchasing additional units of equipment that is already in successful productive use in your facility. If you are using Brand X wireless workstations for iMedConsent, you can purchase additional units to expand wireless implementation.
- c. The moratorium is on purchase and implementation of new technologies—in other words, if you are not using tablet PCs in your facility, you cannot purchase tablet PCs for use with iMedConsent. But if you are already successfully using tablet Brand X at your facility, you may purchase more of them.

If you have any questions about what you can or cannot purchase, please let me know.

4. **October General Release**

The October release should be available by the end of the month. The major functionality changes and enhancements include:

- a. Enhancements to “Documents to Sign” functionality – more information will be displayed about the documents in the category (e.g., provider name). This is the first phase of a redesign of this functionality in the program.

- b. The “Help” menu in the application will provide links to the Admin Content Guide (only accessible by administrative users). This information will include instructions on how to delete unnecessary files using the Windows Task Scheduler.

The Release of Information form has been bumped to the November general release.

Details will be included in the Release notes (forthcoming).

5. **Requesting New Program Enhancements**

To suggest a program enhancement or “tweak” that would make the program better or easier to use, send an email to enterprise@dialogmedical.com. For example, the following questions were raised on the call:

- a. Can a spell checker be added to the document creation wizard?
- b. Can providers can be recognized by the program so that they do not need to select their name on every form?
- c. Can the author of the note be included on the usage report?

These kinds of suggestions will be evaluated by Dialog Medical when submitted to the support system.

6. **Content Change Requests**

There is not yet an easy way to view a comprehensive listing of new content requests on the Dialog Medical Customer Portal. Dialog Medical is working on this. In the meantime, I will add a current listing of content requests that are in the pipeline to the monthly POC Call Minutes (see following pages). Ethics and Patient Care Services are also working on streamlining the VA review process so that these requests can be addressed more promptly.

7. **Revoked Advance Directives**

The Ethics Center is currently working with HIMS to develop national guidelines for documenting revoked or superseded advance directives in the electronic medical record system.

Changes to Existing Consents

DATE	TICKET	REQUESTER NAME/FACILITY	SPECIALTY	CATEGORY	TITLE	NATURE OF REQUEST	STATUS	COMMENTS
7/15/2005	1752	Susan Motley, Lebanon PA	Allergy	Consents	Flu Vaccine	We are requesting that this process be changed so that the Nurses do not need to enter injection site prior to capturing signature. Is there a way that this can be documented after signature capture or can this be taken out of form or not be a required field?	OPEN	
8/1/2005	NA	Robert Silverman, Hines IL	Cardiology	Consents	Heart - Catheterization and Intervention	Please refer to the email string (history) regarding the discussion of Rob's request.	OPEN	
8/1/2005	1939	Mark Kruse, Columbia MO	Cardiology	Consents	Right Ventricle-Implantable Defibrillator	Change title to "Implantable Defibrillator"/ requester doesn't want to imply just one lead	OPEN	
7/20/2005	NA	Jacques Casparian, Lvnwth. KS	Dermatology	Consents	Skin – Skin	Under Alternatives, please add the following: "Try	OPEN	
8/22/2005	Email	Sally Kellum, Durham NC	Eye Health	Consents	Retina-Detachment Repair	Modify "procedure description" section to specify different methods of repair (refer to email)	In VA Rev	Pending Dr. Orcutt's Evaluation
NA	NA	NA	Eye Health	Consents	Eye-Vitrectomy	adding " Possibility of endolaser and or membrane peel " to the procedure section	In VA Rev	Pending Dr. Orcutt's Evaluation
5/12/2005	790	Nancy J. Torbert, St. Cloud MN	Gastroenterology	Consents	UGI Tract Upper Gastrointestinal	there is no "diagnosis"/it's blank	OPEN	
6/20/2005	1482	Mark Kruse, Columbia MO	Gastroenterology	Consents	Esophagus - EGD	Change the field EGD Diagnosis – Gastroenterolgy used in the Diagnosis section of this consent to include the following choices: anemia, abdominal pain, abnormal CT finding, diarrhea, dysphagia, GERD, melena, nausea,vomiting, weight loss (current choices are Anemia, Surveillance of Barrett's esophagus, Foreign body retrieval, Variceal band ligation).	OPEN	
8/9/2005	2020	Sandy Kinney, Augusta ME	Gastroenterology	Consents	Esophagus - EGD	add "dysphagia" to the diagnosis list	OPEN	

Changes to Existing Consents

8/30/2005	2299	Carolyn Lenoir, Denver CO	Gastroenterology	Consents	colonoscopy	adding "cancer miss rate" to applicable colonoscopy consents	In VA Rev	Pending Dr. Sontag's approval
	791	Nancy J. Torbert, St. Cloud MN	Gastroenterology	Consents	Esophagus - EGD	Procedure "EsophagusEGD" missing some conditons and Diagnosis (see ticket 791 for details)	OPEN	
9/16/2005	2573	Tammy Schroder (Dialog Medical)	Int. Radiology	Consents	Artery Atherectomy-Renal	Remove the right_left_both fields. They no longer exist. Unable to process consent.	OPEN	
8/22/2005	2171	Mary Gochenour, Dayton OH	NA	Consents	**Consent for Treatment/Procedure Not In Library	When used along with an existing consent, the existing procedure name does not appear in the final consent view.	CLOSED	Problem fixed and Released
10/3/2005	2729	Joanne Rimac, Cleveland OH	Nephrology	Consents	Kidney-Hemodialysis	see attached notes to ticket / multiple revisions	OPEN	
6/15/2005	1406	Sandra Ramos, Long Beach CA	Orthopedic Surg.	Patient Inst.	Back Pain Recovering	image not found	CLOSED	Problem fixed and Released
6/15/2005	1406	Sandra Ramos, Long Beach CA	Orthopedic Surg.	Patient Inst.	THA Complete Planning Package		CLOSED	Problem fixed and Released
6/15/2005	1406	Sandra Ramos, Long Beach CA	Orthopedic Surg.	Patient Inst.	Resouces for Patients.		CLOSED	Problem fixed and Released
6/24/2005	1558	Sandy Kinney, Augusta ME	Pain Mgmt./Anesth.	Consents	Moderate sedation	Changes requested: 1. ASA classification: () ASA 1- a normal healthy patient () ASA 2- patient with mild systemic disease () ASA 3- A patient with severe systemic disease () ASA 4- A patient with severe systemic disease that is a constant threat to life () ASA 5- A moribund patient who is not expected to survive without the operation 2. Type of anesthesia to be administered: 3. Previous anesthesia history: yes no If yes, where there any complications?	OPEN	

Changes to Existing Consents

7/19/2005	1770	Mark Kruse, Columbia MO	Pain Mgmt./Anesth.	Consents	Nerve Block	Request for more specific template	In VA Rev	Being evaluated By Dr. Rotter
9/27/2005	2658	Joanne Rimal, Cleveland OH	Pain Mgmt./Anesth.	Consents	General Anesthesia	see attached notes to ticket / multiple revisions	OPEN	
9/28/2005	2692	Sonny Roaquin, Durham NC	Pulmonary Med.	Consents	Bronchoscopy	Add "mechanical ventilation" and "death" as risks	OPEN	

Changes to Existing Consents

6/30/2005	1604	Harriet Westra, Little Rock AR	Urology	Consents	Prostate - Radical Retropubic Prostatectom y without Nodes	<p>Description: Urology Consent Changes for: Prostate - Radical Retropubic Prostatectomy without Nodes. 10. WHAT DOES THIS TREATMENT/PROCEDURE INVOLVE? Surgery through an abdominal incision to remove the prostate and seminal vesicles. 12. WHAT ARE THE EXPECTED BENEFITS OF THIS TREATMENT/PROCEDURE? Possible cure or control of cancer. 13. WHAT ARE THE KNOWN RISKS OF THE TREATMENT/PROCEDURE? Please add the following risks: . Loss of penile length . Urinary fistula . Urinary infection . Urinary retention . Death . Injury to bladder or ureters requiring additional surgery Change the 4th risk to: . Injury to rectal wall (rarely requiring temporary colostomy). Change the 5th risk to: . No guarantee of cancer cure and you may need further cancer treatment such as radiation or hormone therapy. 14. WHAT ARE THE ALTERNATIVES TO THIS TREATMENT/PROCEDURE? Please add Cryotherapy to the end of the current sentence.</p>	OPEN
-----------	------	--------------------------------	---------	----------	---	--	------

Changes to Existing Consents

6/30/2005	1604	Harriet Westra, Little Rock AR	Urology	Consents	Prostate - Radical Retropubic Prostatectom y with Nodes	Urology Consent Changes for: Prostate - Radical Retropubic Prostatectomy with Nodes. 10. WHAT DOES THIS TREATMENT/PROCEDURE INVOLVE? Surgery through an abdominal incision to remove the prostate, seminal vesicles and regional pelvic lymph nodes. 11. ON WHAT PART OF THE BODY WILL THIS TREATMENT/PROCEDURE BE PERFORMED? See description of treatment/procedure. 12. WHAT ARE THE EXPECTED BENEFITS OF THIS TREATMENT/PROCEDURE? Possible cure or control of cancer. 13. WHAT ARE THE KNOWN RISKS OF THE TREATMENT/PROCEDURE? Please remove #13: . Renal (kidney) failure. Please add the following: . Lymphocele (collection of lymph fluid) possibly requiring drainage . Injury to pelvic organs or blood vessels requiring additional surgery . Injury to bladder or ureters requiring additional surgery. Change #4 from "Damage" to "Injury. Change #5 to the following: . No guarantee of cancer cure and you may need further cancer treatment such as radiation of hormone therapy.	OPEN
6/30/2005	1604	Harriet Westra, Little Rock AR	Urology	Consents	Prostate - Suprapubic Prostatectom y	Urology Consent Changes for: Prostate - Suprapubic Prostatectomy. 10. WHAT DOES THIS TREATMENT/PROCEDURE INVOLVE? Removal of obstructing portion of prostate gland (Suprapubic Prostatectomy) through an abdominal incision. 13. WHAT ARE THE KNOWN RISKS OF THIS TREATMENT/PROCEDURE? Please add: . Emboli (blood clots) from veins that travel to the lungs.	OPEN

Changes to Existing Consents

6/30/2005	1604	Harriet Westra, Little Rock AR	Urology	Consents	Bladder - Cystectomy/Ileal Conduit Male	<p>Urology Consent Changes for: Bladder - Cystectomy/Ileal Conduit Male. 10. WHAT DOES THIS TREATMENT/PROCEDURE INVOLVE? Removal of entire bladder, prostate and pelvic lymph nodes with diversion of urine to abdominal wall with intestinal conduit and stoma through abdominal incision (Radical Cystectomy and Ileal Conduit). 12. WHAT ARE THE EXPECTED BENEFITS OF THIS TREATMENT/PROCEDURE? Possible cure or control of tumor or cancer. 13. WHAT ARE THE KNOWN RISKS OF THIS TREATMENT/PROCEURE? Please add the following risks: . Loss of penile length. . Lymphocele (collection of lymph fluid) possibly requiring drainage. . Emboli (blood clots) from veins that travel to the lungs. . Electrolyte abnormalities requiring treatment. Please change #10 to the following: . Injury to adjacent organs (bowel, blood vessels, nerves) requiring additional surgery. Please change #11 to the following: . Urinary fistula (urine leak to outside or to other organs). Please remove #12: . Inability to void.</p>	OPEN
-----------	------	--------------------------------	---------	----------	---	---	------

Changes to Existing Consents

6/30/2005	1604	Harriet Westra VA Central Arkansas HCS	Urology	Consents	Kidney - Nephroureterectomy	Urology Consent Changes for: Kidney - Nephroureterectomy. 10. WHAT DOES THIS TREATMENT/PROCEDURE INVOLVE? Removal of kidney, ureter and cuff of bladder (nephroureterectomy) through an abdominal and/or flank incision. 12. WHAT ARE THE EXPECTED BENEFITS OF THIS TREATMENT/PROCEDURE? Possible cure or control of tumor or cancer. 13. WHAT ARE THE KNOWN RISKS OF THIS TREATMENT/PROCEDURE? Please add the following as #1: . Incomplete removal of tumor. Change #4 to: . Injury to nearby local structures - vena cava, aorta, liver, spleen, bowel, pancreas, lung, lining of the lung (pleura), adrenal gland requiring more extensive surgery. Change #6 to: . Persistent abdominal or flank pain or hernia formation in area of incision. Please remove #11: . Pain or hernia formation in area of incision.	OPEN
6/30/2005	1604	Harriet Westra, Little Rock AR	Urology	Consents	Kidney - Partial Nephrectomy Cancer	Urology Consent Changes for: Kidney - Partial Nephrectomy Cancer. 10. WHAT DOES THIS TREATMENT/PROCEDURE INVOLVE? Surgery through the flank or abdomen to remove the portion of the kidney with the tumor or cancer (Partial Nephrectomy). 12. WHAT ARE THE EXPECTED BENEFITS OF THIS TREATMENT/PROCEDURE: Possible cure or control of tumor or cancer. 13. WHAT ARE THE KNOWN RISKS OF THIS TREATMENT/PROCEURE? Please add the following: . Urinary retention Please add to #4 risk: . Injury to nearby local structures - liver, spleen, pancreas, lung, lining of lung (pleura), bowel, adrenal gland, aorta, vena cava requiring more extensive surgery. Please remove "if present" from risk #9.	OPEN
7/20/2005	NA	Joni Baeke, Leavenworth KS	Urology	Consents	Bladder - Cystoscopy	Please add the follow risk to this procedure: "bladder perforation"	OPEN

Changes to Existing Consents

8/22/2005	Email	Jan Sylvester, Charleston, SC	Urology	Consents	Kidney - ESWL/Cystos copy/Stent	Request to remove the reference to "water bath"/ the current procedure is outdated	In VA Rev	Pending Dr. Bodner's Evaluation and approval
