

## **Minutes from National iMedConsent™ VANTS Call**

Wednesday, June 6, 2007

Ray Frazier, National Center for Ethics in Health Care

### **1. Upcoming Release**

Dialog Medical provided an overview of the enhancements being planned for the June release, currently in beta testing. Features will include an improved advance directive progress note, and page breaks in the signature section will be deleted. For details, please refer to the forthcoming release notes.

### **2. Q2 FY2007 Performance Monitor Report**

I provided a brief preview of the Q2 monitor report, and we also discussed possibilities for next year's monitor (TBA).

### **3. Vergence Locator**

Walt Boyle in San Diego asked about the status of the Vergence Locator fix (CCOW Vault Upgrade). Unfortunately, I have not yet received an anticipated release date. This update has tragically stalled in OI&T. I will continue to push for its release.

(Apologies for the abbreviated notes – I was unable to tape this month's conference call.)
